

I am sending this comment to address the issue of the FCC introducing a new broadcast service known as Low Power FM, proposing to expand this service that would allow th LPFM to take priority over current FM translator service. The station I listen to, 94.3 K-Love is heard on Fm Translators. K-love is a station that gives a positive message, and supports wholesome values. It has positive and encouraging messages, that impact communities all across America. There is a lot of negative messages being put out to our youth today, please help us to preserve the little bit of positive and encouraging messages we do have. Help keep K-Love on the air.
Sincerely,
Suzanne Moreno
